

Equipment Failure

1. Note the details on the white board.
2. Post detail on Slack in Repair Channel and contact the school responsible for maintaining that piece of equipment. Each school is responsible for different pieces of equipment. I have listed these below for your information. A copy has also been inserted into the log book.
3. Once repair has been actioned, remove the details from the white board. The pens have been attached to one another to prevent them being misplaced.
